Subject Index to Volume 44[1]

Acetoacetate
Ketone body metabolism in the mother and fetus, 2347
Acetyl-CoA carboxylase
Fatty acid-mediated disaggregation of acetyl-CoA carboxylase in isolated liver cells, 2458
Acute unilateral nephrectomy
Reflex responses to reductions in functioning renal mass, 2840
Adenosine
Capillary transport of adenosine, 2620
Adrenal hormones
Role of adrenal hormones in regulating distal nephron structure and ion transport, 2717
Adrenergic neurotransmission
The human adrenergic neurovascular mechanism, 317
Adrenergic pharmacology
Adrenergic pharmacology of human and canine peripheral veins, 337
Adrenocorticotropin secretion
Hypophyseotropic regulation of adenohypophyseal adrenocorticotropin secretion, 207
Afferent renal nerve activity
Renorenal reflexes: neural and functional responses, 2834
Alcohol
Metabolic effects of alcohol, 134
Prenatal effects of alcohol on growth: a brief overview, 2318
Alkali metal/H^+ transport
Volume regulation by *Amphiuma* red blood cells: strategies for identifying alkali metal/H^+ transport, 2500
Alloreactivity
Idiotypic network regulations of immune responses to HLA, 2483
Alveolar injury
Induction of early alveolar injury by inhaled asbestos and silica, 2596
γ-Aminobutyric acid
Mechanisms of seizure control mediated by γ-aminobutyric acid: role of the substantia nigra, 2414
Angiotensin II
Different effects of vasopressin and angiotensin II on baroreflexes, 2388
Anticonvulsant drugs
Anticonvulsant drug mechanisms of action, 2634
Antiepileptic drugs
Advances in the clinical development of antiepileptic drugs, 2645
Antiepileptic drug research: an overview, 2627
Antiepileptic drugs: detection, quantification, and evaluation, 2629
Antiidiotypic autoimmunity
Idiotypic network regulations of immune responses to HLA, 2483
Antitumor agents
Organ-directed toxicology of antitumor agents, 2335
Appetite
Mechanisms of appetite modulation by drugs, 139
Arachidonic acid
Arachidonic acid metabolites and endothelial injury: studies with cultures of human endothelial cells, 19
Metabolites of arachidonic acid in experimental lung vascular injury, 43
Asbestos
Induction of early alveolar injury by inhaled asbestos and silica, 2596
Atherosclerosis
Proteoglycans in pathological conditions: atherosclerosis, 381
ATP citrate lyase
Compartmentation of enzymes: ATP citrate lyase in hepatocytes from fed or fasted rats, 2448
Autonomic nervous system
Corticotropin-releasing factor: effects on the autonomic nervous system and visceral systems, 243

Baroreceptor resetting
Role of baroreceptor resetting in cardiovascular regulation: acute resetting, 2408
Baroreflexes
Different effects of vasopressin and angiotensin II on baroreflexes, 2388
B cells, resting
Can resting B cells present antigen to T cells?, 2475
B cell tolerance
Idiotype regulation: a model for B cell tolerance, 2480
The signal for tolerance in B cells is not transmitted through antigen-specific immunoglobulin receptors, 2493
Beaumont, William
William Beaumont and the transfer of biomedical information, 9
William Beaumont: the man, his time, and his legacy, 2887
Behavior
Behavioral effects of ovine corticotropin-releasing factor administered to rhesus monkeys, 249
Blood-brain barrier
Epithelial properties of brain capillary endothelium, 2614
Blood-tissue exchange
Modeling of transendothelial transport, 2623
Blood vessels, human
Pharmacology of human blood vessels, 316
B lymphocytes
B lymphocyte development, 2874
Regulation of expression of immunoglobulins M and D in murine B cells, 2652
Body composition
Body composition as affected by physical activity and nutrition, 343

Books received

272, 2376, 2498, 2814, 2885
Bovine corticotropin-releasing factor
Biological and immunological studies of bovine hypothalamic corticotropin-releasing factor, 183
Brain
Preferential utilization of ketone bodies in the brain and lung of newborn rats, 2352
Branched chain α-ketoacid dehydrogenase complex
Regulation of branched chain α-ketoacid dehydrogenase complex by phosphorylation-dephosphorylation, 305

Caffeine
Spontaneous myocardial calcium oscillations: overview with emphasis on ryanodine and caffeine, 2977
Calcium diffusion models
Calcium diffusion models and transmitter release in neurons, 2950
Calcium oscillations, spontaneous
Spontaneous myocardial calcium oscillations: overview with emphasis on ryanodine and caffeine, 2977
Calcium release
Effects of ryanodine in skinned cardiac cells, 2970
Calcium transport
Effects of ryanodine on cardiac subcellular membrane fractions, 2960
Caloric intake
Metabolism of substrates: diet, lipoprotein metabolism, and exercise, 358
Cancer
The epidemiology of selenium and cancer, 2584
Capillary endothelium
Capillary endothelium: a metabolic barrier for solute transport, 2602
Capillary ultrastructure
Effect of albumin on the structure of the molecular filter at the capillary wall, 2610
Capsaicin
Mechanisms of depletion of substance P by capsaicin, 2531

[1] This index covers volume 44, with the exception of nos. 3, 4, 5, and 6, the abstracts issues, which carry permuted subject indexes. The boldface numbers, used in certain entries, refer to the issue number; the lightface numbers refer to page numbers.

Carbohydrate nutrition
Carbohydrate nutrition before, during, and after exercise, 364
Carcinogenesis
Selenium and carcinogenesis, 2561
Cardiac cells
Effects of ryanodine in skinned cardiac cells, 2970
Cardiac glycosides
Progesterone derivatives that bind to the digitalis receptor: effects on Na^+,K^+-ATPase and isolated tissues, 2806
Cardiovascular reflexes
Aspects of cardiovascular reflexes in pathologic states, 2400
Cardiovascular system regulation
Arterial and cardiopulmonary reflexes in the regulation of the neurohumoral drive to the circulation, 2377
Neural regulation of the cardiovascular system during exercise, 2271
Carnitine
How important are carnitine and ketones for the newborn infant, 2369
metabolism
Carnitine and ketones in the perinatal period, 2339
Catecholamine synthesis genes
Genes for neurotransmitter synthesis, storage, and uptake, 2773
Cationic amphiphilic drugs
Newborn response to cationic amphiphilic drugs, 2323
Cell-binding domain
Close and focal contact adhesions of fibroblasts to a fibronectin-containing matrix, 394
Cell proliferation
Changes in cellular glutathione levels: possible relation to selenium-mediated anticarcinogenesis, 2563
Cell volume regulation
Cell volume regulation in frog urinary bladder, 2520
Central nervous system
Electrophysiological actions of corticotropin-releasing factor in the central nervous system, 237
Cerebral artery
Reactivity in human cerebral artery: species variation, 326
Cerebrospinal fluid
Factors influencing the secretion of vasopressin into cerebrospinal fluid, 72
Chemical carcinogenesis
Selenium inhibition of chemical carcinogenesis, 2573
Cholinergic development
Regulation of cholinergic development by target contact, 2760
Cholinergic mechanisms
Coronary artery reactivity in human vessels: some questions and some answers, 321
Ciliary ganglion neurons
Purified proteins acting on cultured chick embryo ciliary ganglion neurons, 2753
Cl^- channels
Role of separate K^+ and Cl^- channels and of Na^+/Cl^- cotransport in volume regulation in Ehrlich cells, 2513
Complement-initiated lung injury
Arachidonate cyclooxygenase metabolites as mediators of complement-initiated lung injury, 46
Conference
Corticotropin-releasing factor, 145–263
Connective tissue polysaccharide
Mechanisms of chain initiation in the biosynthesis of connective tissue polysaccharides, 373
Convulsions
Core mechanisms in generalized convulsions, 2442
Corticosterone
Closed-loop feedback control of the nyctohemeral rise in adrenocortical system function, 177
Corticotropin-releasing factor
Anatomy of the corticotropin-releasing factor and opiomelanocortin systems of the brain, 100
Central and peripheral distribution of corticotropin-releasing factor, 229
Distribution of corticotropin-releasing factor in rat brain, 215
Electrophysiological actions of corticotropin-releasing factor in the central nervous system, 237
Cyclic nucleotides
Neurotransmitters, hormones, and cyclic nucleotides in lymphocyte regulation, 112
Cysteamine
Cysteamine-induced depletion of somatostatin and prolactin, 2546
Effects of cysteamine on the hypothalamic-pituitary axis in the rat, 2551
Neurobiological actions of cysteamine, 2556

Depression
Depression: implications of clinical studies for basic research, 85
Development
Ketone body metabolism in the neonate: development and the effect of diet, 2359
Diet
Ketone body metabolism in the neonate: development and the effect of diet, 2359
Digitalis-like factors
Endogenous digitalis-like factors, 2780
Digoxin
Cardiovascular investigations of an endogenous digoxin-like factor, 2795
Digoxin-like immunoactivity
Endogenous digoxin-immunoactive factor in human subjects, 2800
Distal tubules
Structural adaptation to altered electrolyte metabolism by cortical distal segments, 2710
Dopamine
Modulation of striatal enkephalinergic neurons by antipsychotic drugs, 2535
Drug-nutrient interactions
Metabolic mechanisms of drug-nutrient interactions, 124
Drugs
Metabolic interactions of nutrition and drugs, 123
Drug toxicity
Drug toxicity in the newborn, 2301
Duodenal ulceration
Somatostatin depletion by cysteamine: mechanism and implication for duodenal ulceration, 2540

Eicosanoids
Eicosanoids as mediators of ischemia and shock, 275
Emotion
The stomach's link to the brain, 2889

Employment opportunities

1: 23a; **2:** 19a; **6:** v; **7:** 34a; **8:** 15a; **9:** 19a; **10:** 13a; **11:** 14a; **12:** 17a; **13:** 20a; **14:** 17a; **15:** 12a
Endorphins
Enkephalins and endorphins as modifiers of the immune system: present and future, 92
Endothelial surface
The pulmonary endothelial surface, 2603
Endurance exercise
Protein metabolism during endurance exercise, 348
Energy substrate metabolism
Metabolism of substrates: energy substrate metabolism during exercise and as modified by training, 353
Enkephalins
Enkephalins and endorphins as modifiers of the immune system: present and future, 92
Modulation of striatal enkephalinergic neurons by antipsychotic drugs, 2535
Enzyme compartmentation
Compartmentation of enzymes: ATP citrate lyase in hepatocytes from fed or fasted rats, 2448
Epidemiology
The epidemiology of selenium and cancer, 2584
Epilepsy
Epilepsy: brain-stem seizure mechanisms and drug action, 2412
models of
Neuronal interactions during epileptic events in vitro, 2953
Epinephrine
Measurement of hypothalamic corticotropin-releasing factors in hypophyseal portal blood, 203
Role of epinephrine and vasopressin in the control of the pituitary-adrenal response to stress, 155
Epithelial cell volume
Determinants of epithelial cell volume, 2526
Epithelia, microscopic study of living
Microscopic investigation of structure and function in living epithelial tissues, 2693

Errata

2374, 2590
Essential hypertension
Renal nerves and hypertension: an update, 2846
Excitable membranes
Excitation dynamics: insights from simplified membrane models, 2944
Gated ionic channels and the mechanism of excitability, 2941
Exercise
Metabolic and nutritional aspects of physical exercise, 341
Regulation in physiological systems during exercise in trained and untrained subjects: 5-year update, 2259

Fatty acid metabolism
Fatty acid metabolism and ketone formation in the suckling rat, 2365
Fatty acyl-CoA
Fatty acyl-CoA as an effector molecule in metabolism, 81

Federation news

2, 265, 2741, 2813, 2883
Fetal alcohol effects
Prenatal effects of alcohol on growth: a brief overview, 2318
Fiber, dietary
Physiological and metabolic effects of dietary fiber, 2902
Fibronectin
Close and focal contact adhesions of fibroblasts to a fibronectin-containing matrix, 394
Funding, NIH, SBIR
National Institutes of Health phase I, Small Business Innovation Research applications: fiscal year 1983 results, 2679

Gastric acid secretion
Corticotropin-releasing factor: central action to influence gastric secretion, 255
Gastric emptying
Regulation of gastric emptying, 2897
Gastric motility
Motions of Alexis St. Martin's stomach, 2894
Gastric response
The stomach's link to the brain, 2889
Genetically epilepsy-prone rats
Anticonvulsant drugs and the genetically epilepsy-prone rat, 2640
Gluconeogenesis
Gluconeogenesis in the chicken: regulation of phosphoenolpyruvate carboxykinase gene expression, 2469
Glutathione
Changes in cellular glutathione levels: possible relation to selenium-mediated anticarcinogenesis, 2563
Glycoproteins
Deficiency of two human leukocyte surface membrane glycoproteins (Mo1 and LFA-1), 2664
leukocyte
Leukocyte LFA-1, OKM1, p150,95 deficiency syndrome: functional and biosynthetic studies of three kindreds, 2671

Heparin
Role of heparin and heparinlike molecules in thrombosis and atherosclerosis, 404
Hepatocytes
Isolated hepatocytes as experimental material for nutritional research, 2446
History
William Beaumont and the transfer of biomedical information, 9
Hormones
Neurotransmitters, hormones, and cyclic nucleotides in lymphocyte regulation, 112
H^+ secretion
Structure-function relationships in H^+-secreting epithelia, 2704
β-Hydroxybutyrate
Ketone body metabolism in the mother and fetus, 2347
Hypertension, essential
Relationships among endogenous digitalis-like factors in essential hypertension, 2782
sodium-dependent
Neurohumoral mechanisms of sodium-dependent hypertension, 2393
Hypothalamic-pituitary axis
Effects of cysteamine on the hypothalamic-pituitary axis in the rat, 2551
Hypothalamoneurohypophyseal system
Neurological control of vasopressin release, 66
Hypothalamus
Neural pathways mediating adrenocortical responses, 169

Ia structure-function relations
Use of molecular techniques for analysis of Ia structure-function relationships, 2730
Idiotype regulation
Idiotype regulation: a model for B cell tolerance, 2480
Immune system
A complete regulatory loop between the immune and neuroendocrine systems, 108
Enkephalins-endorphins: stress and the immune system, 91
Immunoglobulin receptor, antigen-specific
The signal for tolerance in B cells is not transmitted through antigen-specific immunoglobulin receptors, 2493
Immunoglobulins
Immunoglobulins: gene and protein structure, 2650
Regulation of expression of immunoglobulins M and D in murine B cells, 2652
Immunomodulators
Enkephalins and endorphins as modifiers of the immune system: present and future, 92
Enkephalins: immunomodulators, 118
Immunoreactivity
Localization, colocalization, and plasticity of corticotropin-releasing factor immunoreactivity in rat brain, 221
Inflammation
From Beaumont to poison ivy: marine sponge cell aggregation and the secretory basis of inflammation, 2914
Ionic channels, gated
Gated ionic channels and the mechanism of excitability, 2941

K^+ channel
Role of separate K^+ and Cl^- channels and of Na^+/Cl^- cotransport in volume regulation in Ehrlich cells, 2513
α-Ketoacid dehydrogenase
Nutritional control of branched chain α-ketoacid dehydrogenase in rat hepatocytes, 2463
Ketone bodies
Preferential utilization of ketone bodies in the brain and lung of newborn rats, 2352
Ketone body metabolism
Carnitine and ketones in the perinatal period, 2339
Ketone body metabolism during development, 2342
Ketone body metabolism in the neonate: development and the effect of diet, 2359
Ketones
How important are carnitine and ketones for the newborn infant, 2369
Kindling
Core mechanisms in generalized convulsions, 2442

L

Letter

2883
Leukocyte surface membrane
Deficiency of two human leukocyte surface membrane glycoproteins (Mo1 and LFA-1), 2664
Leukotrienes
Leukotrienes: their formation and role as inflammatory mediators, 25
Prostaglandins, leukotrienes, and lung fluid balance, 18
LFA-1, Mac-1 glycoprotein family
The LFA-1, Mac-1 glycoprotein family and its deficiency in an inherited disease, 2660
Lipoprotein metabolism
Metabolism of substrates: diet, lipoprotein metabolism, and exercise, 358
Liposomes
Modulation of oxidant lung injury by using liposome-entrapped superoxide dismutase and catalase, 2591
Lipoxygenase pathways
Lipoxygenase pathways of macrophages, 2933
Locomotor activity
Corticotropin-releasing factor and behavior, 259
Lung
Preferential utilization of ketone bodies in the brain and lung of newborn rats, 2352
Lung fluid balance
Prostaglandins, leukotrienes, and lung fluid balance, 18
Lung microvascular injury
Effect of neutrophil migration induced by leukotriene B_4 on protein permeability in sheep lung, 30
Pulmonary microvascular effects of arachidonic acid metabolites and their role in lung vascular injury, 36
Lymphocyte surface antigens
Lymphocyte surface antigens. Introduction, 2863

Macrophages
Macrophages as effector cells, 2925
Maternal opiate dependence
Effects of maternal opiate abuse on the newborn, 2314
Mesenteric circulation
Vasoactive agents in control of the mesenteric circulation, 2743
Metabolism, chemical
Nutrient regulation of chemical metabolism in humans, 130

MHC-encoded molecules
Molecular biology and chemistry of MHC- and Tla-encoded molecules, 2728
Mineralocorticoid escape
Contribution of sympathetic neural reflexes to mineralocorticoid escape, 2382

Minisymposium reports

Regulation of branched chain α-ketoacid dehydrogenase complex by phosphorylation-dephosphorylation, 305

Minisymposiums

B cell tolerance, 2480–2496
Immunoglobulins: gene and protein structure, 2650–2659
Lymphocyte surface antigens, 2863–2873
Macrophages as effector cells, 2925–2936
Molecular biology and chemistry of MHC- and Tla-encoded molecules, 2728–2740
Phenotyping of macrophages, dendritic cells, and NK cells, 2660–2677
The role of MHC-encoded molecules in lymphocyte activation, 2475–2479

Minisymposium summaries

B lymphocyte development, 2874
Fatty acyl-CoA as an effector molecule in metabolism, 81
Monoclonal antibodies
Production and characterization of monoclonal antibodies directed against connective tissue proteoglycans, 386
Monokines
Monokines and the metabolic pathophysiology of septic shock, 300
Morphine
Morphine depression of T cell E-rosetting: definition of the process, 95

Na^+/Cl^- cotransport
Role of separate K^+ and Cl^- channels and of Na^+/Cl^- cotransport in volume regulation in Ehrlich cells, 2513
Na^+/H^+
Na^+/H^+ exchange in volume regulation and cytoplasmic pH homeostasis in lymphocytes, 2508
Na^+,K^+-ATPase inhibitor
Evidence for a circulating endogenous Na^+-K^+ pump inhibitor in low-renin hypertension, 2789
Neonatal drug metabolism
Drug metabolism in the newborn, 2302
Neonate
How important are carnitine and ketones for the newborn infant, 2369
Neural control, renal
Neural control of renal function. Introductory remarks, 2815
Neural encoding
Neural interaction in control of adrenocorticotropin, 161
Neural reflex control
Arterial and cardiopulmonary reflexes in the regulation of the neurohumoral drive to the circulation, 2377
Neural regulation
Neural regulation of the cardiovascular system during exercise, 2271
Neuroendocrine system
A complete regulatory loop between the immune and neuroendocrine systems, 108
Neuronal development
Functional interaction of developing neurons with their target tissue, 2750
Neuropeptides
Opioids and neuropeptides: mechanisms in circulatory shock, 290
Neuroregulatory peptides
Chemical modulation of regulatory peptides, 2530
Neuroscience
The contribution of neuroscience to exercise studies, 2279
Theoretical trends in neuroscience, 2939
Neurotransmitters
Neurotransmitters, hormones, and cyclic nucleotides in lymphocyte regulation, 112
Newborns
Carnitine and ketones in the perinatal period, 2339
Drug toxicity in the newborn, 2301
